FoamChariot® III's are tow stable, self contained, purpose built, NFPA compliant assets, designed for firefighting and spill security where truckload, railcar or storage tank quantities of liquid fuels are involved in fire or catastrophic spills. FoamChariot® III is designed for fire departments having medium duty towing capacity and tight budgets. FoamChariot® III is balanced to be towed with 3/4 to 1 ton truck and stores in a 8.5 ft. x 21 ft. space. FoamChariot® III can be stored outdoors when equipped with freeze protected AR-AFFF or electric tote wraps. FoamChariot® III extra heavy duty frame and tote retaining system is key to this unit's utility and attractive price. FoamChariot® III features a three point leveling option, is standard with dual 8000 lb. torsion axel and electric brakes. FoamChariot® III is well balanced, stable and rated at highway speed while carrying 825 to 990 gal. foam concentrate. Available in four and six-tote purpose built, deck over axel versions with various generator, and storage cabinet options.
