## **Class A Foam And Wetting Agents (emulsifiers)**

To Whom It May Concern:

National Foam's Class A foams (Responder and Knockdown) are not in the fluorine debate and do not contain fluorinated PFAS compounds.

Neither product are Aqueous Film Forming Foams (AFFF's) containing PFAS compounds.

Their wetting and foaming ability rely on non-fluorinated hydrocarbon surfactant foamers and wetters.

A handwritten signature in black ink, appearing to read 'James Cottrell'.
